

Data Validation (DV) State Web Software Release 1.1.1

RELEASE NOTES

Release Date: March 2008

SUMMARY

The Data Validation (DV) State Web Software Release 1.1.1 has been installed on your system. This release contains bug fixes to the existing web-based DV application. The DV State Web application can be accessed from your state home page.

Notes to System Administrators:

Step 1: In order for users to access the application to perform Data Validation they need to be added to the "dvsys" group. Please use "webmin" to perform this task. You will need to log into webmin and follow the sequences below:

- Click on System
- Click on Users and Groups
- Under "Local Group" click on "dvsys" under Groups name
- Click on "..." button to select members
- Click on the username to be added to the dvsys group
- Click o.k. (the user has been added to the dvsys group)

Step 2: Each user must have a record added to the v_auth_users table which allows the user to access the specific DV module: Benefits, Tax, or both. In order to add users permitted to access the application the System Administrator needs to log into the Informix Database and execute one of the following SQL statements below for each DV user.

In order for the DV user to have access only to the Benefits Module, use this SQL statement:
Insert into v_auth_users (username, benefits_flag, tax_flag) values ('jdoe', 'Y', 'N');

In order for the DV user to have access only to the Tax Module, use this SQL statement:
Insert into v_auth_users (username, benefits_flag, tax_flag) values ('jdoe1', 'N', 'Y');

In order for the DV user to have access to Benefits and Tax Modules, use this SQL statement:
Insert into v_auth_users (username, benefits_flag, tax_flag) values ('jdoe2', 'Y', 'Y');

Extract File:

The record layout formats for each population are listed in the application and each data entry field must be entered as instructed. The extract file must be stored in the "/opt/dv/data/" directory once it is imported into the SUN UNIX system. After submitting the Report Validation and Data Element Validation for a particular Extract file to the National Office, the extract file must be archived.

**Data Validation (DV) State Web Software Release 1.1.1
RELEASE NOTES**

Release Date: March 2008

1. Bug Fixes

Problem	Fix
Tax populations 1 and 2 - Load hung at the time of checking duplicates.	Improved the performance of duplicate detection.
Tax population 5 - Audit ID field of data type character was being retrieved as type integer from the database.	Modified Tax application to retrieve Audit ID as a string.
Benefits population 3 – Software was not rejecting prior quarter claim type records that were not filed within the prior quarter.	Modified Benefits application to reject prior quarter claim type records.
Benefits Population 3 - On RV screen, the group totals for Group 3.01 excluded counts from population 3a.	Modified Benefits application to include the counts of sub populations from populations 3 and 3a in calculation of the group totals for Group 3.01 .
Tax population 1 and Benefits population 5 - Step numbers on sample validation screen did not match the UI Tax and Benefits Handbooks.	Modified Tax and Benefits sample validation screens to match the labels on the handbooks.
